

TELEMETRY + RANGE OPERATIONS

+ Vehicles, trailers, and containerized platforms

+ Designed, manufactured, and integrated in-house

+ Key industry connections for field-proven products

+ EMI/RF shielding options

+ Robust warranty and IT sustainment programs

FUTURE-READY SOLUTIONS

Modern testing and instrumentation demands uncompromising precision and exceptional performance in rigorous, extended deployments. When your work takes you to the field, and efficiency and safety are paramount, we deliver.

Industry-leading capabilities for any mission.

For government, commercial, military, utility, and other applications, Nomad's mobile telemetry and range solutions connect personnel with critical data any time, anywhere on the globe. Our modular, human-centered designs ensure comfort, performance, and safety today, with flexibility to grow into the future. We engineer and manufacture in-house for the utmost security, and our key industry connections mean leading-edge solutions are within easy reach.

TELEMETRY + RANGE OPERATIONS

WHY MOBILE // FLEXIBILITY, EFFICIENCY, SAFETY, ROI

1) *Flexibility.* Liberate mission design from the constraints of fixed equipment. Operate anywhere on the globe, and freely adjust assets as dictated by changing scenarios. 2) *Efficiency.* Deploy quickly with minimal labor. Set up machine-to-machine communications for reliable data exchanges. 3) *Safety.* Station personnel in mobile assets, safely removed from uncertain events, to reduce risk and ensure operational success. 4) *ROI.* Increased utilization means higher Return on Investment... More Deployments + More Data = Greater Value Delivered.

WHY NOMAD // INTEGRATION, SERVICE, SUSTAINMENT

1) *Vertical Integration.* Keeping engineering, production, and tech integration in-house ensures quality, security, and customer access to the project at any stage. 2) *Warranty + Sustainment.* What does the future look like? Improve ROI with a Nomad solution geared toward reliability today, and modernization for the unforeseen missions of tomorrow. 3) *Partnerships.* With nearly two decades building status quo-shattering solutions, Nomad has the industry relationships needed to drive innovative projects and challenging procurements across the finish line.

SHIELDED SOLUTIONS // EMI/EMP/RF PROTECTION

Natural and man-made interference pose increasing threats to command and communication assets. From simple interference mitigation to full-on, Tempest-rated environments, Nomad designs and builds rock-solid platforms that protect. Contact us to learn more about improving security and creating clean testing environments.

CUSTOMER PROJECTS // INNOVATIVE DESIGNS, PROVEN IN THE FIELD

Zodiac Aerospace: Mobile Telemetry Antenna Trailers

U.S. Air Force: 45th Space Wing Mobile Telemetry Vehicle
